

Black Belt Pirates <RSHR>

Group 7

Team members

Roqaya Alwabari

Heba Aljassir

Samaher Alghamdi

Rawan Alsharekh

Rawan:-

I want to learn how to create interactive and easy-to-use applications for users, and also I want to learn what is the rules of designing.

Personal goals

Roqaya:-

To become a confident UX/UI designer, by delivering a great, end-to-end user experience for all customers.

Heba:-

Learn and focusing on the extensive understanding of user values, needs, and limitations. And produce user-friendly interfaces

Personal goals

Samaher:-

Become a confident ux / ui designer to assist the user in solving their problems with the least possible efforts

Team strength

Roqaya

Interface Design
Research skills
Presentation skills

Interface Design
Programing skills
Research skills

Rawan

Programing skills
Designing and
developing applications
Data analysis skills

Heba

-Graphic design.
-programming
by using "
HTNL,CSS,JS"
-critical thinking

Samaher

- We all promise to listen to each other's ideas with respect
- We all promise to do the work as best as we can
- We all promise to do the work on time
- We all promise to ask for help if we need it

note: If someone on our team breaks one or more of our agreements, the team may have a meeting and ask the person to follow our agreement. If the person still breaks an agreement, we will ask our teacher to help find a solution.

Team Contract

Team rules

Team goals

- To improve customer satisfaction and loyalty through the utility, ease of use, and pleasure provided in the interaction with a product.
- Offering a great experience to users
- Makes our users to be our promoters

Dealing with Differences

IN CASE OF EMERGENCY

Write down all the important note that we had discussed in the meeting, directly after the meeting, so everyone be up to date.

COMPUTER CRASH

Upload all the files and documents that we had worked on online, so it can be accessed from any other device.

DIFFERENT OPINION

Voting, and the high voties will be implemented

Black Belt Pirates team

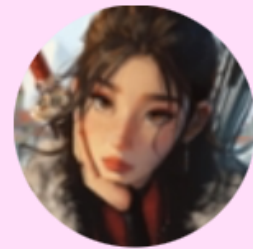

Samaher Alghamdi

Graphic Designer

programming by using 'HTML,CSS, JS'

Critical thinking

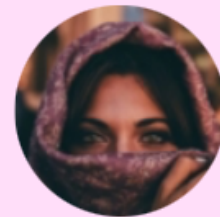

Heba Aljassir

Programming java/python

Designing and developing applications

Data analysis GCP [clouding]

Roqaya Alwabari

Programming with JavaScript/html/php

Miro

How will you deal with the work?	How much work will you do? Can you commit to working a certain number of hours?	How will you hold each other accountable?
As a team, we will divide up the work equitably based on their strengths, and if anyone needs to learn something, the others will help her .	Yes, as long as everyone is available during that time	We holding each other accountable requires open and clear communication, particularly in areas such as: Reporting progress. Expressing difficulties. Staying on the same page with other teams or committees connected to your work.
When will you all be working?	How will you handle project planning?	How will you handle conflicts?
We will work at a time when everyone is available	we will make a schedule for what we need to do using applications that can help us like Trello and Miro	Accept conflict. Remember that conflict is natural and happens in every ongoing relationship Be a calming agent Listen actively. Analyze the conflict. Model neutral language. Separate the person from the problem. Work together. Agree to disagree.

Trello
